SUMMARY

Detail-oriented Full Stack Web Developer with strong expertise in React.js and Django REST Framework. Experienced in building scalable e-commerce platforms, admin dashboards, and task management systems with secure JWT authentication and optimized database structures. Passionate about writing clean, maintainable code and building high-performance web applications.

TECHNICAL SKILLS

Frontend	React.js, Redux Toolkit, JavaScript (ES6+), HTML5, CSS3, Responsive Design
Backend	Python, Django, Django REST Framework (DRF), JWT Authentication, MySQL
Tools & Platforms	Git & GitHub, Postman, VS Code, REST APIs, Deployment Basics

Final Year Project

AI-Based Campus Energy Prediction and Optimization System (AWKUM)

Technologies: Python, Pandas, NumPy, Scikit-Learn, XGBoost, Matplotlib, Streamlit, Joblib

Developed an AI-powered energy management system for university campuses to minimize electricity wastage and optimize power consumption using machine learning and data-driven simulation techniques.

Developed an AI-powered campus energy management system using XGBoost to forecast hourly energy consumption based on temperature, time, occupancy, and seasonal patterns. Performed data preprocessing and feature engineering on historical multi-floor datasets, implemented energy optimization and solar integration to reduce peak grid load by up to 30%, and built a Streamlit dashboard for energy forecasts, optimization results, and scenario analysis. Serialized the trained model using Joblib for efficient reuse without retraining.

WEB PROJECTS

E-Commerce Website

<https://github.com/MuneebAmin55/fullstack-ecommerce>

Technologies: React, Redux Toolkit, Django, DRF, MySQL

Developed a full-stack e-commerce platform with product browsing, filtering, persistent cart, checkout, and order management. Implemented JWT authentication, protected routes, admin product/user/order management, and RESTful APIs for reliable frontend-backend communication.

Task Management System

<https://github.com/MuneebAmin55/django-task-manager>

Technologies: React, Django, DRF, MySQL

Built a task management application with complete CRUD operations for creating, updating, tracking, and deleting tasks. Implemented user authentication and access control with a clean, responsive dashboard for efficient task organization and management.

PawPal – Pet Health Care Tracker

Technologies: React.js, Firebase

Developed a pet healthcare tracker for managing pet profiles, medical records, vaccinations, reminders, veterinary information, documents, and emergency health profiles. Built with React.js and Firebase for secure authentication and cloud-based data management.

Education

2022 – 2026	Bachelor in Computer Science Abdul Wali Khan University Mardan CGPA – 3.35	University
2020 – 2022	FSc (Intermediate) Unicom College Rustam Mardan Percentage: 81%	College
2018 – 2020	Matriculation Unicom College Rustam Mardan Percentage: 85%	School

KEY COMPETENCIES

Problem Solving, Clean Code Practices, API Integration, Database Design, Team Collaboration, Attention to Detail

LANGUAGES

English – Fluent, Urdu – Proficient
